

Top 10 Reasons Businesses Choose 911 Enable

"911 Enable's solution was simple and easy to set-up. Their knowledgeable and accessible professional services team went the extra mile to get our E911 solution operational in the shortest time frame possible. We couldn't have asked for a smoother implementation process."

Dave Ochoa
Telecom Administrator,
Invensys Wonderware

1. The Only End-to-End E911 Solution

911 Enable delivers the industry's only complete E911 solution for IP telephony. From phone management through to call delivery, 911 Enable's integrated solution ensures seamless functionality and performance.

2. The Only Solution Provider Specialized in E911 for IP Telephony

911 Enable's primary mandate has always been to respond to the challenges of VoIP 911, and its expertise has established it as the leader in the enterprise market. Proven in over 1,000 organizations, 911 Enable's IP-based solutions meet the needs of the most demanding enterprise deployments.

3. The Largest E911 Coverage in the Industry

911 Enable provides E911 connectivity to over 6,000 PSAPs across the US and Canada, ensuring emergency support for the entire workforce including branch offices, work-at-home employees, and teleworkers.

4. The Simplest Solution to Manage

911 Enable automates and simplifies the management tasks associated with E911. IP phones may be tracked automatically, and comprehensive reporting and monitoring tools are accessible via an intuitive, user-friendly Dashboard.

5. World-class, Personalized Service and Support

911 Enable's professional services team is highly knowledgeable and experienced, providing step-by-step support throughout the planning, implementation, testing, and maintenance stages. 911 Enable's skill and technology ensure that E911 implementation remains within the customer's allocated timeline and budget.

6. Lowest Total Cost of Ownership (TCO)

911 Enable offers the lowest TCO compared to any available E911 solution. Its solutions eliminate the costs associated with dedicated 911 trunks, local gateways, PS-ALI accounts, ELINs, and hardware/software licensing.

7. Superior Network Reliability

911 Enable provides continuous E911 call routing services, 24 hours a day, 7 days a week, 365 days a year. Its resilient and reliable network infrastructure is built to the high standards necessary for emergency services. Since 2005, it has delivered 100% up-time while handling an average of 20,000 911 calls per month.

8. Unparalleled On-Site Security Notification Tools

911 Enable's solutions offer more on-site security notification tools than any other E911 solution on the market today. Security personnel may be notified of emergencies via direct call delivery or PSAP monitoring, and alerts may be sent out via email, SMS, and automatic screen pops.

9. Certified with the Widest Range of Industry-Leading Voice Platforms

911 Enable's solutions are certified with industry-leading IP-PBX vendors, including Cisco, Avaya, ShoreTel, 3Com, and Aastra. It also supports a variety of other PBX systems and switches, ensuring quick and simple E911 implementation.

10. Compliance with All E911 Legislation and Standards

911 Enable's solutions are compliant with FCC, CRTC, and NENA i2 standards, and meet or exceed E911 regulations across the US and Canada.
